CRISTIAN PAUL
PEÑARANDA ROJAS

PROFESSIONAL PROFILE

Working experience deploying, customizing and automating Linux based systems for 8 years, from embedded systems to cloud computing clusters.

Multiple skills around Devops culture from application automation, continuos delivery and continous deployment. I'm familiar with information security systems and embedded software development.

Consider myself a person that always seeks to be on the edge of technology. I'm devoted to my work and always want to give value by creating new ways to solve problems.

SKILLS

CI/CD Pipelines Experienced	**Chef Automation** Intermediated
GNU/Linux Based Systems Administration Experienced	**IoT/Embedded Systems** Intermediated
Bash Programing Intemediated	**Ruby** Beginner
Amazon Web Services Intermediated	**Python** Beginner
Information Security Intermediated	

STUDIES AND CERTIFICATIONS

ELECTRONIC ENGINEERING
Universidad del Valle - Cali
2 years cursed - *not finished*

ELECTRONICS TECHNOLOGY
Universidad del Valle - Buga
4 years cursed - *not finished*

LANGUAGES

Spanish: Native
English: B2/C1

WORK EXPERIENCE

ALERTLOGIC (Nov 2013 - Current)
Infraestructure Engineering

Projects
- Administration of on-promise and cloud platform of around 2000 hosts
- Federated RabbitMQ cluster
- Graphite HA implementation
- Continous maintenance and improvement of Software Defined Infraestructure (Chef and Cloudformation)
- MySQL Failover process
- Automation of employee transition process
- Implementation of Backend Access Control infraestructure on AWS

SISTEMAS TGR (May 2008 - Oct 2013)
Information Security Consultant

Projects
- Design and deployment and integration of multiple SIEM platform for up 2GBps/s traffic (OSSIM)
- Implementation of UTM and network monitoring solutions (Endian Firewall)
- Analysis and case management of security incidents

W ELECTRONICA (Jan 2005 - Aug 2007)
Technician

Projects
- Traffic Light Maitenance "Monitoring and maintenance of Buga City traffic light system"
